Büşra Kanbur

Sprint 2

Url: https://busrakanbur.github.io/C311-sprint2/

Used jQuery plugins:

1- Slick Carousel
   I use this in Home page. I use this to create slider on top of the page.
2- Sticky Button
   I use this on every page. On the left bottom side of every page there are 3 sticky buttons which do not change their positions even if we slide through the page.
3- Magnific popup
   I use this on Art page. When we click on any picture, it opens as a popup. I can be closed with x mark on the right corner.

Used jQuery UI Widget

1- Dialog Widget
   ~~I tried to use this, but it does not work. I don't know where I went wrong.~~
   It works!! I use this on the Contact page. (On click Submit button)
